# Nuriddinov Shokrukh

Full-Stack Web Developer (React / Next.js / Node.js)

Full-stack engineer who builds functional, user-centered applications from concept to deployment. Experienced in creating large-scale platforms used by thousands of users, integrating modern tooling, and delivering features that combine strong engineering with great user experience.

## Skills

**Frontend:** React.js, Next.js, TypeScript, JavaScript, React Query (TanStack), Redux, Zustand, HTML, CSS, Tailwind CSS, Sass, shadcn/ui, Material UI, Recharts

**Backend:** Node.js, Express.js, NestJS, REST APIs, GraphQL APIs, JWT Authentication, WebSockets, Socket.io

**Database:** PostgreSQL, MongoDB, Prisma, Mongoose, TypeORM

**DevOps & Tools:** Git, GitHub, Vercel, Inngest, Postman, Figma, VS Code

## Experience

### ○ Sep 2023- Sep 2025

Sammi.ac

#### Full stack Developer

- Contributed to the development and maintenance of a large-scale online education platform used by 70,000+ active learners
- Built and maintained a Learning Management System (LMS) supporting video lectures, progress tracking, user dashboard, admin dashboard
- Implemented interactive features including a resume-builder tool that automatically generates professional CVs for learners
- Developed reusable, scalable UI components using React, Next.js, Tailwind CSS, improving development speed and UI consistency
- Integrated backend services using Node.js, Express, MongoDB, and REST APIs
- Optimized API response times and frontend performance, contributing to improved page load speed and user engagement

## Personal & Academic Projects

### ○ 2024 - Present

#### Full stack developer

- E-commerce Website:** Developed product catalog, cart, checkout flow, Stripe payments, and admin tools. Integrated Stripe payments, order management, and role-based admin tools. Implemented authentication, authorization, and secure APIs. Tech stack: Next.js, Node.js, MongoDB, Stripe, Tailwind CSS
- AI-Powered Stock Tracker Platform:** Built a real-time financial analytics platform with live stock prices, candlestick charts, intelligent search, watchlist, and AI-powered alerts. Implemented automated workflows using Inngest for alert scheduling, daily summaries, and earnings notifications. Created an admin dashboard for stock management, publishing news, and monitoring user activity.
